Createspace Independent Publishing Platform, United States, 2013. Paperback. Condition: New. Language: English. Brand new Book. WE HAVE MET THE "HEAT DEATH" OF THE UNIVERSE IN PROGRESS, AND IT IS. US? In the unauthorized collection of essays, *The Theory of Everything*, by Stephen Hawking, he describes mixing as a process of entropy, and entropy as disorder. He gives the example of 2 types of molecules in a box, separated by a barrier. Remove the barrier and the 2 types of molecules will mix together, increasing their entropy. I wondered about hydrogen and oxygen separated by a barrier. If hydrogen and oxygen do not mix together, they cannot form molecular bonds to result in H₂O. Water, that stuff generally favored by life that covers most of the Earth and that makes up most of our bodies, including our brains. If mixing is entropy and entropy is disorder, were they telling me that water is disorder? Then there is the arrow of time. A water glass falls off a table to shatter on the floor. The fact that a glass will do this now and then but will never reform up on the table from which it fell demonstrates the one-way street of time toward entropy. I applied the arrow of time to many processes beneficial to life, from programmed cell death in our bodies to the formation of fertile top soil from decay to harvesting of plants and animals for food. Was entropy really disorder in the sense that people think of that term? All forms are finite, but nature barter with entropy, and life employs it. "Organic cells form, reproduce, and die within complex organisms that are born, reproduce, and die, within species and civilizations that eventually segue into new species and civilizations or simply carry on until they become extinct....
